Held at the Gavin Herbert Eye Institute on the UC Irvine Campus

A gerontologist, geriatrician, and geropsychologist team up to talk about planning for a healthy future in mind, body and spirit.

- This will be optimistic but not sugar-coated; we know you want a realistic viewpoint.
- This will be clear but not “dumbed down”; we know the audience members are intelligent and sophisticated.
- This will be edifying and entertaining; we will distill the most current, reliable information into a useful discourse.

*We hope you'll join us!*
